

GENERAL GUIDELINES FOR FACIAL PROPORTIONS

A-Eyes fall about half way between the top of the head to the bottom of the chin

B-Hairline to eyebrows= $1/3$

C-Eyebrows to bottom of nose= $1/3$

D-Bottom of nose to bottom of chin= $1/3$

E-Width between eyes (across bridge of nose) is about the width of an eye

F-Outside corners of mouth are directly beneath each pupil

G-Top of ears close to eyebrows

H-Bottom of ears close to bottom of nose

Additional notes:

Children have higher foreheads so the distance from the eyes to the hairline is greater than in adults.

Childrens's eyes typically fall below the horizontal midline.

Children have narrower mouths so the corners of the mouth will be closer to the width of the nose.

There will always be variations from these guidelines but it's good to keep these things in mind.
